

**In the specification:**

Please delete paragraph [0015] which appears in the specification at page line , and substitute the following paragraph [0015] therefore:

[0015] In another embodiment of this invention, a reinforced cementitious board is provided which includes a cementitious core, such as those including Portland cement or gypsum, and a reinforcing fabric disposed on at least one face of the cementitious core. The reinforcing fabric includes a plurality of warp yarns having a first twist (turns/inch) and a plurality of weft yarns having a second twist which is greater than the first twist. A resinous coating is applied to the fabric in a "coating weight distribution ratio" of less than about 2.0:1, based upon the weight percentage of the resinous coating on the weft yarns, over the weight percentage of the resinous coating on the warp yarns ((weft coating weight / weft yarn weight) ÷ (warp coating weight / warp yarn weight)).
